Navi Mumbai, India | (+91) 7666950530 | rajpakhurde.work@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFILE

PG-DAC graduate from Sunbeam Institute (CDAC) with hands-on experience in Java, Spring Boot, React.js, Node.js, and Event-Driven Microservices. Built full-stack applications and SaaS products with REST APIs, JWT authentication, and RabbitMQ. Module Topper in Web Programming Technologies. Looking to contribute to real-world software solutions.

EDUCATION

Sunbeam Institute of Information Technology, (CDAC) Aug 2025 – Feb 2026
Post Graduate Diploma in Advanced Computing (Grade: A)

G.M Vedak Institute of Technology, Mumbai University, July 2021 – May 2025
Bachelor of Engineering in Computer Engineering (CGPA: 8.17)

INTERNSHIP EXPERIENCE

GRPTechs – Software Development Intern April 2026 – June 2026
Node.js, React.js, Camunda DMN/BPMN Rule Engine (v7) Raigad, Maharashtra

- Built a full-stack SaaS platform providing a user-friendly interface for creating and managing business rules on top of the open-source Camunda Rule Engine (v7), replacing its limited native modeler for end users
- Designed a Node.js middleware layer to securely proxy and protect Camunda's public rule-evaluation APIs, adding an authentication and access-control boundary between end users and the engine
- Developed a bulk rule-evaluation feature to upload test inputs via Excel; implemented multithreading in Node.js, partitioning inputs across worker threads to concurrently call Camunda's evaluation API and reduce response time.
- Built the React.js frontend for rule configuration, testing, and bulk evaluation workflows

PROJECTS

AutoSphere | *Java, Spring Boot, C# .NET, RabbitMQ, MySQL, React.js, Redux* | [GitHub Repo](#) Aug 2025 – Feb 2026

- Engineered a full-stack vehicle resale platform with role-based workflows for Admin, Buyer, and Seller, using an **Event-Driven Microservices Architecture** with a decoupled .NET (C#) notification service
- Integrated **RabbitMQ (via Docker)** for asynchronous communication between the Spring Boot monolith and the .NET microservice, ensuring non-blocking API responses and high fault tolerance
- Implemented JWT-based authentication and role-based access control (**RBAC**), and designed **RESTful APIs** for listings, test-drive scheduling, and approval workflows
- Built a responsive React.js frontend with Redux for state management and protected routing

ExamSync | *React.js, Express.js, Electron.js, SQLite* | [GitHub Repo](#) Jan 2025 – May 2025

- Developed a cross-platform desktop application to automate exam cell operations and academic workflows
- Implemented modules for student data management, exam scheduling, hall ticket generation, and result processing
- Designed and handled structured datasets with **2000+ student records** efficiently
- Implemented **PDF generation** for hall tickets, enabling automated document creation and distribution
- Built reliable backend workflows ensuring data consistency and smooth processing of academic operations

TECHNICAL SKILLS

Languages: Java, C#, JavaScript, SQL, HTML, CSS

Backend Development: Spring Boot, .NET Core, Microservices, Spring MVC, Spring Data JPA, Hibernate, RESTful APIs, Node.js, Express.js

Frontend Development: React.js, Redux Toolkit, Bootstrap

Databases & Messaging: MySQL (Indexing, Query Optimization), RabbitMQ

Tools & Technologies: Docker, Git, GitHub, Postman, Swagger, VS Code, Spring Tool Suite

ACHIEVEMENTS / PARTICIPATION

- Module Topper in Web Programming Technologies during PG-DAC at Sunbeam Institute (CDAC)
- Secured 2nd position in Computer Engineering department with CGPA of 8.17
- Volunteered at Swadesh Foundation for health camps and educational outreach programs
